

HIGH RISE IN-ROUTE STEM

SPEC TABLE		AERO ROAD RISER STEM			
Material	Carbon Fiber				
Length, Reach, Stack, Weight	Length	Reach	Stack	Weight	
	80mm	77.3	43.5	175g	
	90mm	87.3	44.9	173g	
	100mm	97.3	46.2	179g	
	110mm	107.3	47.3	185g	
	120mm	117.3	48.2	188g	
	130mm	127.3	49	197g	
Rise	+12				
Clamp Diameter	31.8mm				
Steer Tube Clamp Diameter	1 1/8"				
Face Plate Material	Aluminum				
Hardware Material	Titanium				
Torque Spec: Face Plate	6Nm				
Torque Spec: Steer Tube	6Nm				
Cable Routing	IN-Route System				
Computer Mount	ENVE K Edge Aero Road Computer Mount				
Spacers	ENVE IN-Route 2-Piece Spacer				
Max Spacer Height	40mm				
PART NUMBER					
300-1036-101	80mm Stem Aero IN-Route, +12 deg				
300-1036-102	90mm Stem Aero IN-Route, +12 deg				
300-1036-103	100mm Stem Aero IN-Route, +12 deg				
300-1036-104	110mm Stem Aero IN-Route, +12 deg				
300-1036-105	120mm Stem Aero IN-Route, +12 deg				
300-1036-106	130mm Stem Aero IN-Route, +12 deg				

Often an overlooked part, but important in its function and integration of drivetrain components, the SES Aero Stem features a refined shape and carbon laminate that bridges the gap between the touch points of the handlebar and the bike. Fully integrating and concealing all cabling from the shifters to the frame, the SES Aero Stem is the final piece of the puzzle to a cleaner looking bike and clean airflow for real world aero performance.
