

# GRD FORK

The ENVE Gravel Road Fork is not just a repurposed cyclocross fork or simply a carbon fiber road fork with increased tire clearance; it is a fork built from the ground up to specifically service the gravel and all-road markets. Axle to crown length and fork rake were carefully chosen for the intended use. Other key features include a 1-1/8 to 1-1/4 tapered steerer tube, 12mm thru-axle dropout, and a carbon fiber fender that keeps mud and water off you and your bike. The full carbon fender can be installed or removed in seconds. Brake calipers mount to the new Flat Mount standard and will work with 140 and 160mm (with adapter) rotors.

<b>Wheelsize:</b>	700c
<b>Fork Weight:</b>	450g
<b>Fender Weight:</b>	150g
<b>Rake:</b>	47mm
<b>Axle to crown:</b>	382mm
